*Introducing Team EVNXT:*

EVNXT is an ambitious group of engineers based in Secunda, South Africa, who have united their expertise, enthusiasm, and love for sustainable technology. Founded by a collective of innovative minds, this team has made it their mission to redefine solar technology. They come together in their home garage, where they have built their exceptional solar car, known as Bumblebee.

*From Lotus 7 Inspiration:*

Bumblebee takes inspiration from the classic Lotus 7 sports car kit, showcasing the team's commitment to merging iconic design with cutting-edge solar technology. This fusion results in a remarkable solar car that embodies both style and sustainability.

*Embracing the Cruiser Class:*

In their quest for innovation, EVNXT has chosen to compete in the Cruiser Class, a category that challenges competitors to create practical, innovative solar vehicles. Their entry into this class is a testament to their dedication to pushing the boundaries of solar transportation.

*Debuting at the Ilanga Cup:*

The Ilanga Cup marks EVNXT's debut in solar challenges, representing their first-ever participation in a solar car competition. Held at the renowned Red Star Raceway, this competition offers them a platform to showcase their pioneering spirit and their exceptional solar car, Bumblebee.

*Shaping the Future:*

EVNXT's journey is not only about competition; it's about shaping the future of solar car technology. With Bumblebee as their creation, they aspire to demonstrate that sustainable, solar-powered transportation can be as stylish as it is eco-friendly.

*Join us at the Red Star Raceway for the Ilanga Cup and witness EVNXT as they embark on their maiden voyage in the world of solar technology, bringing innovation, style, and a vision for a sustainable future.*
